

PORTABLE THREADING MACHINE MASTERMATIC2

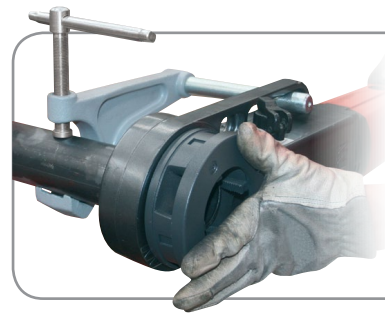

Mastermatic 2 Portable Threading Machine is **ideal piping maintenance in industrial environments**. Its compact dimensions allow to work in areas of difficult access in a comfortable way.

**Portable,
 compact
 and efficient**

CE *G12: MONTHS OF WARRANTY

1. Mastermatic-2 can thread pipes up to 2" easy and comfortably.

2. Accurate operation due to the precision machining of the aluminum cover, which makes all the **four dies perfectly concentric**.

3. It offers greater productivity due to **double speed of backward movement**.

4. The head threaders have been specially designed with a greater length in order to get more stable settlement, reducing vibrations and **providing better thread and smoother work**.

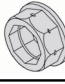

5. The total quality is achieved by a **body made in malleable iron and the dies made in special cutting steel hardened to 58-62HRC**.

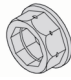

6. The machine is presented in a **reinforced blow mold case for an easy transportation and better protection**.

OILER

IMPORTANT: Never use liquid coolants or other water based products. **Only threading cutting oil should be used.**

COD	CAP	Kg. 	
64130	5L	4,0	1

The threading oil has high cooling and lubricant properties, always use it in order to get best quality threads and to extend the life of dies and machine.
