

SLIP JOINT PLIERS

EGA Master's slip joint plier is a versatile tool perfect for a wide range of tasks. Used in gripping work.

1. Adjustable to 2 different positions, expanding the grip capacity of the pliers.

2. Thin head for hard-to-reach areas.

3. Jaws with thin and thick teeth to grip objects of different shapes. Thin teeth are used for gripping and fastening smaller objects and thick teeth for gripping and fastening bigger objects, increasing the grip pressure due to the lever effect.

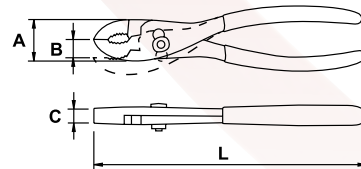

4. Non-slip handles.
